

## Reciprocated Exchange

**Instrument Name:** Chicago Neighborhood Study

**Scale/Subscale Name:** Reciprocated Exchange

**Source:** Chicago Neighborhood Study

**Developers:** Sampson, Morenoff & Earls

**Year:** 1999

**Target Audience(s):** Ages 18 +

**Language other than English available:** None

**Type:** Attitude

**Data collected:** Quantitative

**Data collection format:** Self-report – Pre/post

**Reading Level:** Flesch-Kincaid 10.5

**Existence of test/technical manuals, user guides, supplemental materials:**

Instrument and further information can be found at: <http://www.cdc.gov>

**Level of training necessary for administration/scoring/interpretation:** None

**Widespread Use/Professional Endorsements:** None

**Cost of Use:** No costs associated with use of this instrument, *but developer must be contacted.*

**Description:**

- This 5-item survey measures the relative frequency of social exchange within the neighborhood on issues of consequences for children.

**Psychometrics:**

*Information on reliability and validity are provided below. If information on a particular psychometric was not found, it is indicated as “no information provided.” It should be noted that this is not necessarily an indication of a lack of reliability or validity within a particular scale/instrument, but rather a lack of rigorous testing, for various reasons, by the developers or other researchers.*

**Reliability:** *A correlation of at least .80 is suggested for at least one type of reliability as evidence; however, standards range from .5 to .9 depending on the intended use and context for the instrument*

**Test-Retest:** No information provided

**Internal Consistency:** .65

**Inter-rater reliability:** No information provided

**Validity:** *The extent to which a measure captures what it is intended to measure.*

**Content/Face Validity:** No information provided

**Criterion Validity:** No information provided

**Construct Validity:** No information provided
